
Problems logging into Jawt

Posted by robsamandkeo - 2010/03/07 14:44

Sorry god but its persisting fires up dns server error and takes about 8+ attempts to get online, all other sites on net ok just jawt and your koi sites :(

No problems here so far - touch wood

Perhaps GOD is trying to tell you something :whistle:

im the same!

took me ages to get on! couldnt at all yesterday! and i cant from my works pc either!

just managed to now! for how long i dont know as it knocked me off this morning & i havnt been able to get back on till now!:(

Ok guys, I've spent all morning checking the server settings, dns settings, speaking to the guys that maintain the server rack etc etc and everything is 100% spot on, there's nothin in the error logs and I'm unable to replicate any issues.

So, next time you have trouble, do me a favour and go to www.pagewash.com and tell me if you can get on from there.

BTW, a list of your ip addresses and isp's would also be good if you have trouble again

Ok, shoot the idiot if you want to..... (maybe kindest thing to do to me too! ;))

but where do I find these ip's and isp's??? Once I know where to find them I will let you have them. :)

ISP = Internet Service Provider - The people you connect to the internet though, bt, virgin, talktalk etc

IP - Just go to the home page and you'll be told your IP addy on the bottom of the left hand side
